

Effect

Stamina and agility are promoted. Everyday challenges can be practiced in the form of various exercises. Safety in daily life is thereby improved and mobility increased.

Purpose

Everyday life can contain various hazards. Climbing stairs, descending stairs, stepping over obstacles, racing from one place to another. For a child a step can be an obstacle which is almost impossible to overcome. For older people an uneven path can pose a dangerous challenge. Those who are prepared for these hazards can master everyday life with happiness and safety. Specifically designed exercises promote mobility and make independent living easier.

Function

The stations, based on real-life situations, invite you to try them out and exercise. Alongside agility, stamina is also trained in this circuit course. The path is set up so that not all the obstacles need to be overcome and so that an accompanying person can give best possible help. Handrails on both sides at every station additionally ensure the highest safety.

Technical information

Core-free timber

sawn-timbers of mountain larch, selected according to eight quality criteria, core-free thus decreasing the occurrence of cracking

anchoring to the ground

all parts used for anchoring to the ground made of hot-dip galvanised steel

Dimensions

(small deviations possible)

height	1.05 m
length	3.20 m
width	0.90 m
Order No. 11.50402	495 kg
Order No. 11.50403	335 kg

Safety

This equipment is not playground equipment within the scope of EN 1176 and therefore is also not subject to the requirements of this standard. Nevertheless, it is complied with where appropriate.

For more detailed explanation of the quality characteristics see price list.

Components

Order No. 11.50402 Stone Path

- 1 frame
- 1 pallet of stones
(to be filled with e.g. sand on site)
- 4 steel feet

Order No. 11.50403 Wooden Path with log end pavers

- 1 piece of equipment with pre-mounted log end pavers
(to be filled with e.g. sand on site)
- 4 steel feet

Installation information

Surfacing
no requirements
recommended:
bark mulch, wood chips, or the like

Foundations
4 items 30 x 30 x 35 cm
excavation depth 55 cm

Attention!
Exact measurements may vary, for all installation dimensions refer to current installation instructions.
Subject to technical changes!
