**Purpose**

The brain is our most important organ. In order for it to remain efficient it needs regular external influences. Just like our muscles, our brains need to be stimulated in order for them to keep working properly. However, this stimulation needs to be varied and balanced. That's why it is important to equally challenge all the five abilities of our brain.

**Function**

Stations to increase the powers of concentration, cognition, memory, word finding and perception promote the "grey cells". A range of exercises with different degrees of difficulty offer a challenge for young and old. The corresponding answers can be found on the back of each station.
