## From Fish Cutter to Atlantic Liner: attractive play ships made of metal

The special feature of this play ship is its material: metal. The idea of the designer and the manufacturer is to offer a piece of play equipment worthy of the term ship, which at the same time fulfils the expectations of children, planners and maintenance specialists. The metal ship can be integrated into a harbour or a river landscape and combined with appropriate accesses such as walkways, bridges or nets.

The production technologies are based on those of professional ship builders. The fixtures – preferably made of wood – such as ladders, deck planks or wheelhouse, contribute to the welcoming play atmosphere. The hull is open underneath and made up of modular elements from which various types of ships can be made.

## Press Information.

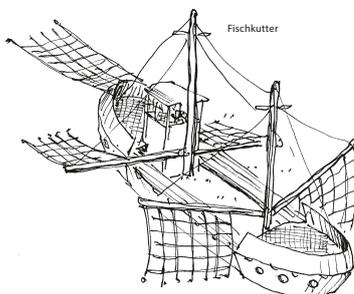

February 2017

Changing the superstructure or using special accessories allows us to create distinctive ships based on the basic version (Sand Play Ship), such as an Atlantic liner, a Mississippi paddle steamer, a fish cutter, a channel dredger or a fire-fighting boat.

Mississippi Raddampfer

Fischkutter

Playground equipment, manufacturer: Richter Spielgeräte GmbH, Simsseestraße 29, 83112 Frasdorf, Tel.: +49 (0) 80 52 17 98 - 0, Fax: + 49 (0) 80 52 41 80, E-Mail: [info@richter-spielgeraete.de](mailto:info@richter-spielgeraete.de), Internet: [www.richter-spielgeraete.de](http://www.richter-spielgeraete.de)

Installation and construction therefore require very little time and effort: The ship is delivered in one piece on a flat-bed truck (70 cm loading height). It is unloaded with a crane and set down on firm ground. Only the mast and the sand transport system require the usual construction foundations. The fall protection should be sand or pea gravel. The complete assembly of the ship can be carried out in a single day.
